

```
/*  
3. Write a java Program to input an array of integers and display the  
second highest number.  
Example  
10 20 5 7 30  
Output 20  
*/
```

```
public class CWS_secondbig {  
    public static void main(String[] args) {  
        int temp, size;  
        int array[] = { 10, 20, 25, 20, 96, 57 };  
        size = array.length;  
  
        for (int i = 0; i < size; i++) {  
            for (int j = i + 1; j < size; j++) {  
  
                if (array[i] > array[j]) {  
                    temp = array[i];  
                    array[i] = array[j];  
                    array[j] = temp;  
                }  
            }  
        }  
        System.out.println("Third second largest number is:: " +  
array[size - 2]);  
    }  
}
```
