

```
import java.util.Scanner;

public class CWS_replaseString {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.println("Enter Your Sting: ");
        String str = sc.nextLine();
        String rs = str.replace("i", "*");
        System.out.println(rs);
        sc.close();
    }
}
```
