```java
/*
2. Write a java Program to print the sum of the inputted number
Example : if no = 4567
Then sum of the no = 4+5+6+7 = 22
*/
import java.util.*;

public class CWS_totalsum {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.println("Please enter a number to calculate sum of
digits");
        int number = sc.nextInt();

        int sum = 0;
        int input = number;
        while (input != 0) {
            int lastdigit = input % 10;
            sum += lastdigit;
            input /= 10;
        }
        System.out.println("Sum of digits of number: " + sum);

        sc.close();

    }
}
```
